

AE-CCM-GS-VD66GY-C-71

1.5MP RGB Global Shutter, MIPI, Compact camera module

Overview:

The AE-CCM-GS-VD66GY-C-71 is a Compact camera module using STMicroelectronics VD66GY 1.5-megapixel 1/4" RGB global shutter image sensor, which is optimized for visible and near-infrared applications with an embedded auto-exposure.

The AE-CCM-GS-VD66GY-C-71 CCM can generate a full resolution (1124 x 1364) image with up to 88 frames per second (FPS).

With a 71-degree vertical field of view Fixed Focus lens, the AE-CCM-GS-VD66GY-C-71 provides outstanding image quality and is highly suitable for a wide variety of applications.

Note: Former part number
AP-ST-VD66GY-145A

Main features:

Image Sensor: 1/4" VD66GY RGB

Shutter type: Global shutter

Resolution: 1.5 Megapixel

Interface: MIPI

FOV: D84° H57° V71°

Focus type: Fixed Focus

Dimensions: 6.5x6.5x3.98mm

Customization options:

- Lens (FOV, F#, Distortion etc.)
- Flex PCB length
- Connector/ Pin Assignment

Target application:

- Computer vision
- AR/VR
- Drones
- Barcodes
- Personal and industrial robotics
- Biometrics and gestures
